

# SIXTH-GRADE NEWSLETTER: JAN 23, 2012

---

The Sixth-Grade did a great job with their science projects – excellent work for a “practice year”. Although the Sixth-Grade cannot continue on to Balboa Park, their work is credited toward their third quarter Science grade (and again, all the students did very well). Many of the science projects will be on display in our room during Open House of Catholic Schools’ Week.

In Religion, we continue to study Salvation History (through Old and New Testament Scriptures, and the teachings and sayings of Jesus). In Science, we are researching solutions and chemical reactions. For Social Studies, we are beginning to study the first empires in the Mesopotamian region of the Middle East. Hopefully, we will all have a joyful and productive week.

Peace of Christ,

Mr. Buckles
